

# NEON™

## *Bowling*

# No Strings Attached with this attraction

Experience the nostalgia of classic bowling with a fresh, modern twist. Our game brings together the best of both worlds, featuring cutting-edge air cylinder technology for smooth, reliable pin movement and precise scoring. Whether you're chasing high scores or just enjoying a casual game, you'll appreciate the perfect blend of retro charm and state-of-the-art design that makes every roll a thrill.

# Strike the Perfect Setup: Single & Double Lanes, Benches, and Mats for Every Bowling Style!

## Dimensions

- **Single Lane:** 217" Length X 40" Width X 105" Height
- (4ft and 8ft lane inserts available for 22ft, 26ft)
- **Double Lanes:** 217" Length X 84" Width X 105" Height
- (4ft and 8ft lane inserts available for 22ft, 26ft)
- **Double Lanes With Bench:** 28' 4.1" Length X 84" Width X 105" Height

# Classic Bowling

Classic Bowling is just like the traditional bowling you love to play. Enjoy the thrill of splits, spares and strikes! Classic mode has LED-lit pins, and the ability to play with up to 4 players.

Throughout all the mini-games there is a chance for multipliers and free balls.

# NEON BOWLING

## Triple Strike

The goal of this mini game is to get a “strike” on all 3 rolls. On the first throw the player will have to knock down the first 3 pins, on the second throw 6 pins and the third throw all 10 pins.

## Time Your Shot

In Tme Your Shot you need to aim for the pin that is lit up blue. The blue pin changes every two seconds.

## Red Pin Challenge

In Red Pin Challenge the player must avoid hitting the red pin while trying to knock down blue pins. Players are given 2 tries to knock down all the pins without hitting the red pin.

### 75" Monitor

75" HD monitor protected by 3/8 polycarbonate (the same material as riot shields and bank windows).

### Bright Lights

Bring the lanes to life with vibrant, glowing features, including light-up pins, illuminated gutter rails, a glowing ball dispenser, and a brilliantly lit podium.

### Hand Dryer

Neon Bowling adds extra convenience with a built-in hand dryer, keeping players' hands dry and ready for action right at the game station.

### Versatile Payment Options

Neon Bowling gives you plenty of options to let players play and pay how they want to. Neon Bowling allows up to 4 players at once and amount of frames per player is adjustable.

### Ball Return

Side ball return allows players to watch the ball being returned and allows operators ease of access to ball return. Safety is key so there is no pinch point at pickup.

### Perfectly Sized Ball

The 4.5" ball fits perfectly in your hand. At 2 pounds the ball is the perfect weight for bowlers of all ages. Game comes with 3 balls.

FEATURES

# Quick to Set Up: Installation Made Easy

## 1 Fast

One lane can be installed with 2 people in less than 3 hours.

## 2 Innovative

With no installation costs and a hassle-free setup, getting Neon Bowling up and running is as easy as it gets!

## 3 Effective

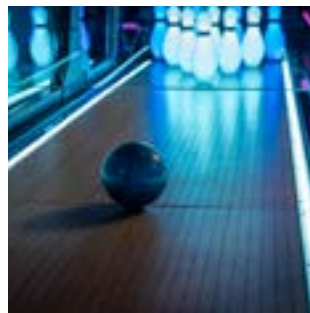

Neon Bowling ships in 3 pieces, and all pieces fit through a standard 36" door.

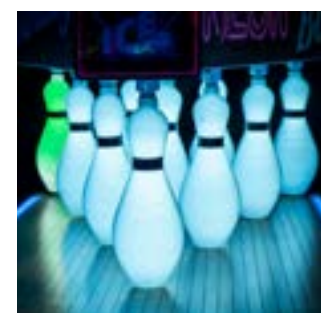

## Durable and Functionable

LEDs have redundant signals; the game is still playable if individual segments are damaged

Lane is made of high strength phenolic laminate and will not dent

Easily change pins with one plug and fastener

## Advanced Pin Lifting System

- **Air Cylinder Precision:** Unlike traditional duckpin systems, which use **mechanical pin setters**, your game employs **air cylinders to lift and position pins**. This technology allows for smoother, quieter, and more precise pin movement.
- **Consistent Operation:** The air-powered mechanism ensures uniform pin action, reducing the chances of mechanical malfunctions and inconsistent pin placement.
- **Innovative Features:** Our game's integration of modern technology, such as addressable LEDs and automated pin control, contrasts with the more traditional, mechanical approach of duckpin bowling, offering a more engaging and visually appealing experience.

## Reduced Mechanical Complexity

- **Simplified Maintenance:** The air cylinder system simplifies maintenance compared to the more complex mechanical pin setters of duckpin bowling. Fewer moving parts mean less wear and tear and easier upkeep.
- **Durability:** Modern air cylinders are designed to withstand repeated use, offering greater durability and reliability than older mechanical systems.

## Pneumatics

- Industrial grade air compressor, regulator and valves (not a cheap consumer compressor)
- 110/220v configurable
- Automatic pressure & condensation drain on power off
- Safe, low operating pressure (30psi, less than car tires)

**Compressor comes with an 18-month Warranty**

# Enhanced Pin Position Tracking

## Individual Pin Sensors

Each pin in your game is equipped with its own up and down switch, providing accurate real-time tracking of pin status. This level of precision is a significant upgrade from the less sophisticated systems used in duckpin bowling.

## Reliable Feedback

The sensors offer immediate and accurate feedback on pin position, improving game fairness and player satisfaction.

## Improved Game Responsiveness

- **Faster Pin Reset:** The air cylinder system allows for quicker and more efficient pin resetting, reducing downtime between frames.
- **Precision Control:** The use of air cylinders provides finer control over pin movement, enhancing the overall gameplay experience with more precise and predictable outcomes.

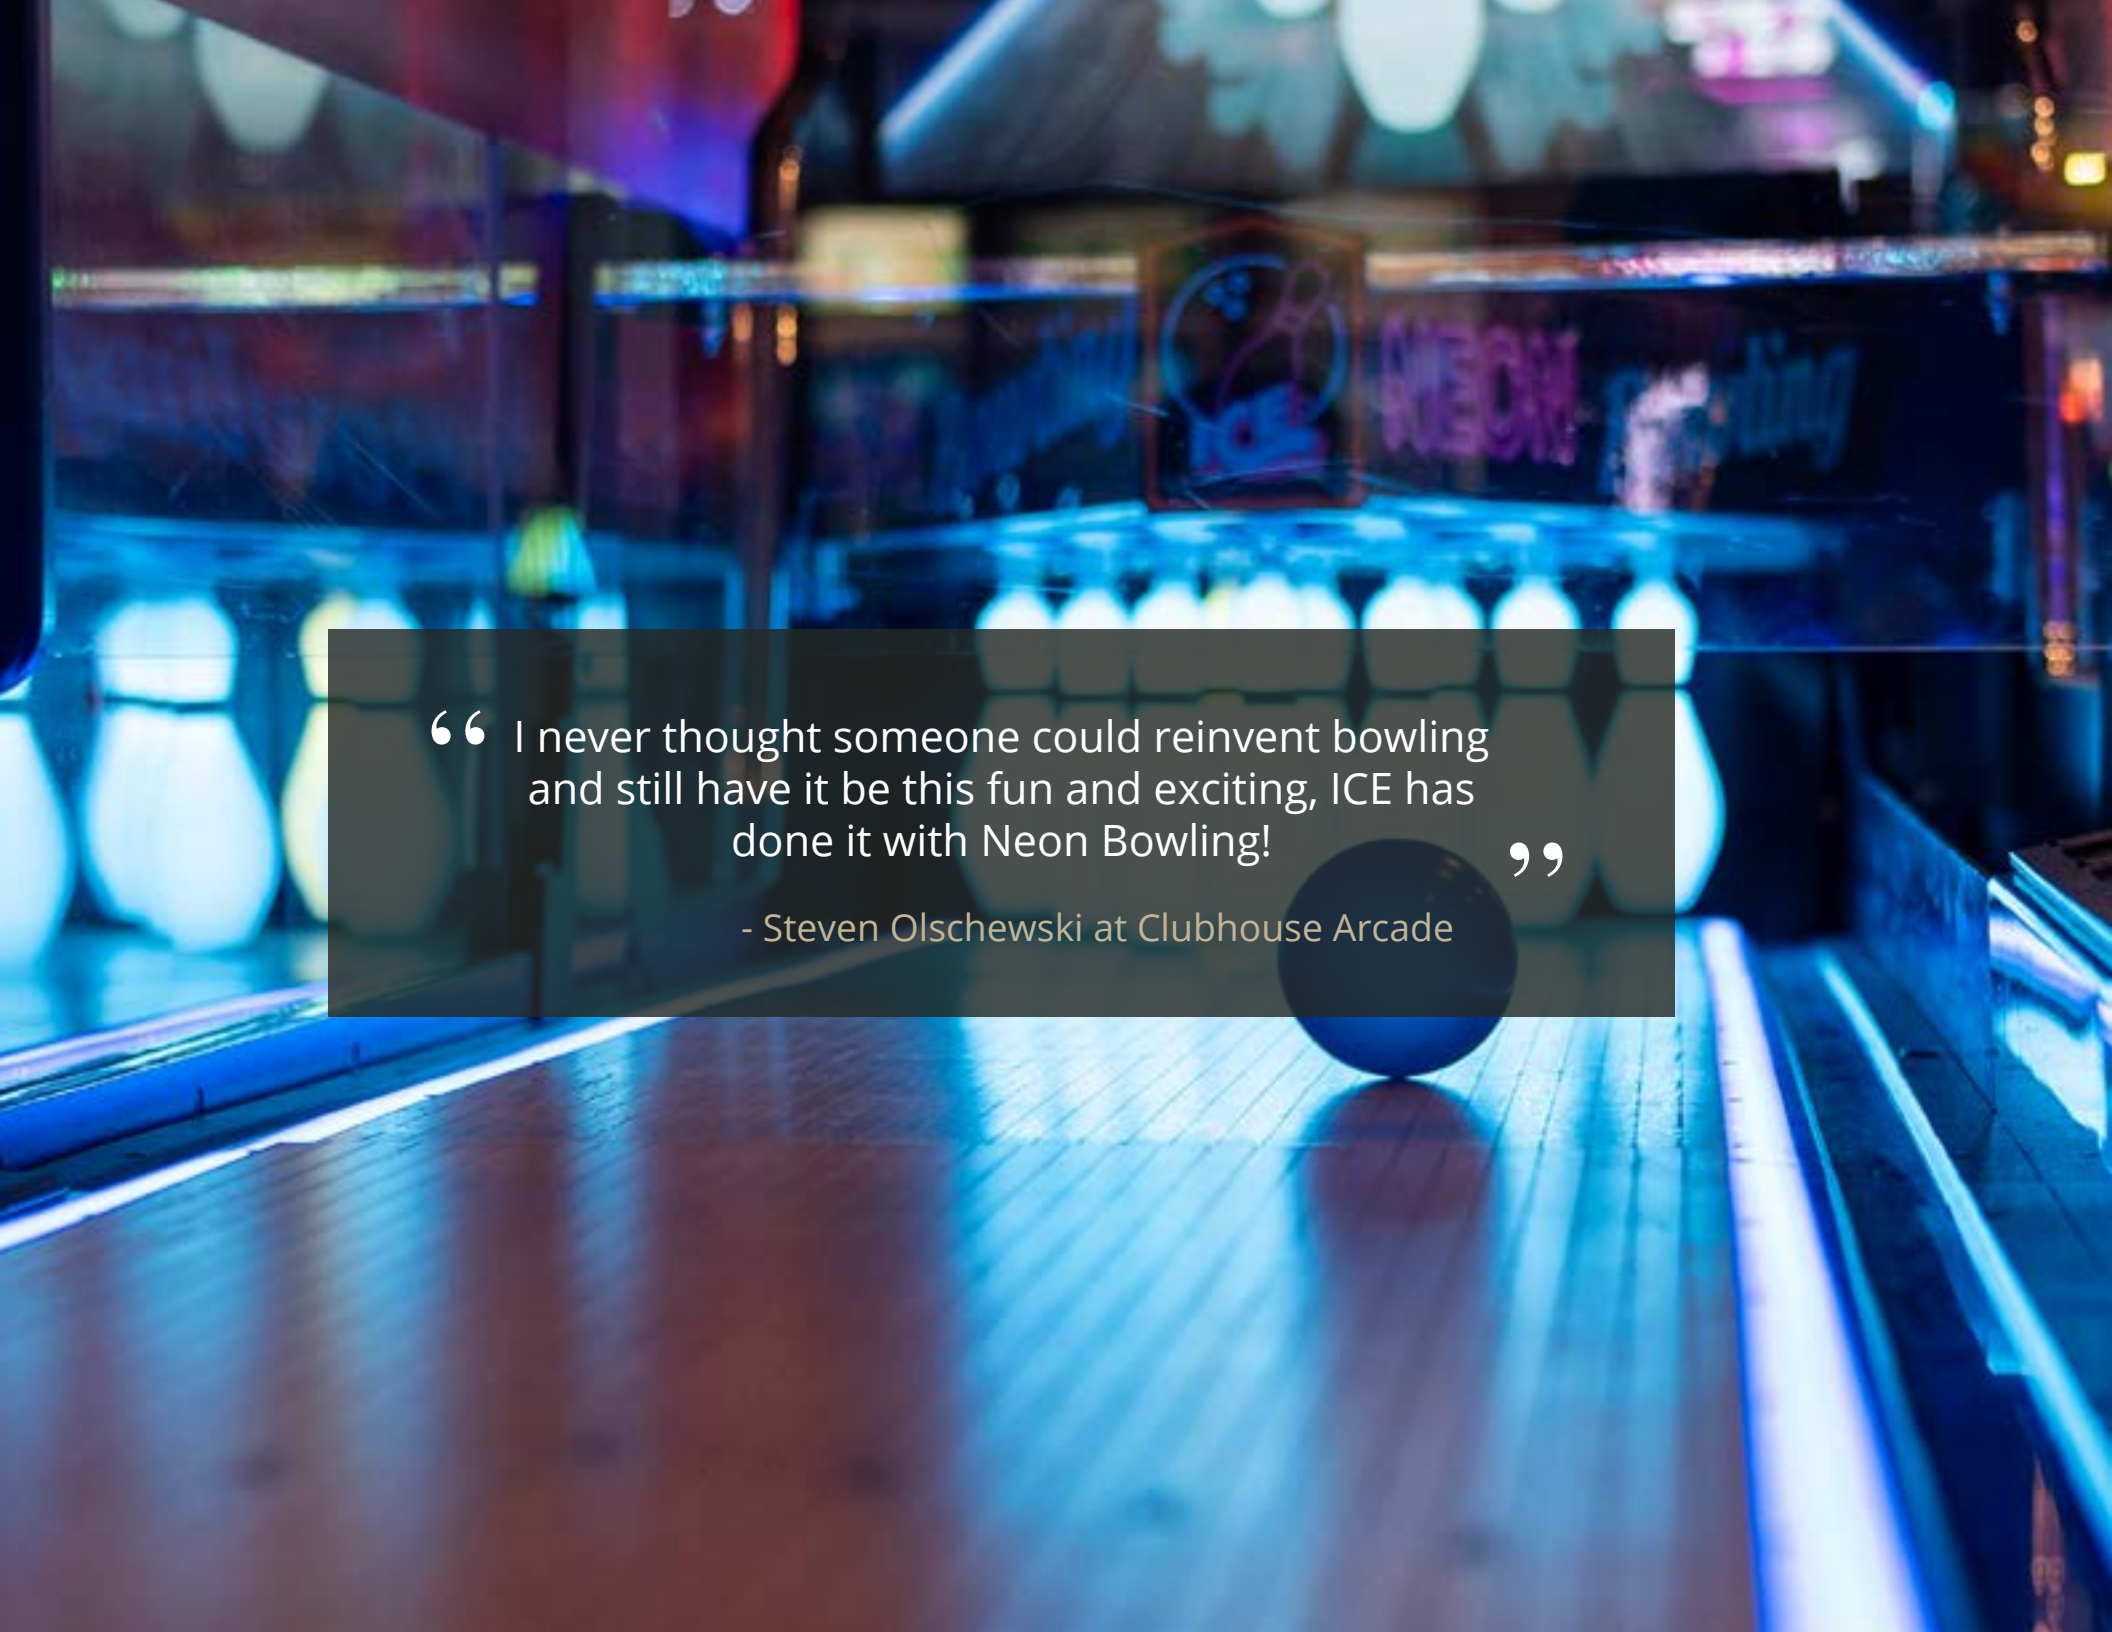

# REAL ACTION

A photograph of a bowling alley with vibrant neon lighting. The scene is dominated by blue and purple hues. In the foreground, a glowing blue bowling ball sits on the wooden lane. In the background, a rack of white bowling balls is visible, and a sign with the word "NEON" is illuminated. The overall atmosphere is modern and energetic.

“ I never thought someone could reinvent bowling and still have it be this fun and exciting, ICE has done it with Neon Bowling!

”

- Steven Olschewski at Clubhouse Arcade
